THE PROJECT:

Essential Care (Organics) Ltd are a family-run business based in Mildenhall, who are passionate about the power and efficacy of genuine natural skin care. They manufacture natural skin care and organic beauty products for sensitive skin under the brand Odylique. All products are hand-made in their Suffolk workshop which ensures the highest level of products quality and freshness. Their commitment to the protecting the environment through their business saw them recognised as Suffolk's Greenest Small Business in 2012.

Always looking to cut their energy use where they can, they have recently used a grant from the Business Energy Efficiency (BEE) Anglia project to improve their roof insulation and upgrade their current lighting to LED equivalents with PIR sensors.

Following an independent energy audit, Essential Care (Organics) Ltd were awarded over £3,700. The energy savings gained by implementing this project will amount to 9.7CO₂e per year, plus cost savings of over £2,000. This will support future growth within their business, while working to protect our environment in line with their environmental policy.

"SUSTAINABILITY IS AT THE CORE OF WHAT WE DO, IT'S ONE OF OUR KEY VALUES SO BOOKING AN ENERGY REVIEW WITH BEE ANGLIA WAS AN EASY DECISION. THE PROCESS WAS SIMPLE, BEE ADVISOR DAVID HELPED US TO COMPLETE THE FORM FOR THE GRANT AND IDENTIFIED THE CARBON SAVINGS. I'D DEFINITELY RECOMMEND BEE ANGLIA"
