THE PROJECT:

Little Beck Properties is a small family run commercial property letting agent in North Suffolk. Based near Beccles, they have small industrial units to let for workshop, manufacturing and storage use. They have recently been awarded grant funding from the Business Energy Efficiency (BEE) Anglia project for the purchase and installation of a new condensing boiler.

Following an independent energy audit, Little Beck Properties successfully applied for a grant of £2,800. The energy savings gained by implementing this project will amount to 5.1 CO₂e per year, plus cost savings of almost £900. This will support future growth within their business, while working to protect the environment in line with their environmental policy.

"BEE ADVISOR OLLIE FOUND THAT OUR SYSTEM WAS GROSSLY INEFFICIENT AND LEFT ON ALL THE TIME. OUR NEW BOILER WORKS AT 95% EFFICIENCY AND IT IS CONTROLLED BY A FULLY PROGRAMMABLE ELECTRONIC SYSTEM, BOTH OF WHICH SHOULD COMBINE TO RESULT IN SIGNIFICANT SAVINGS IN FUEL OVER THE YEAR.

A GOOD REASON TO LOOK FORWARD TO WINTER!"
